INNOVATIVE NURSERY TECHNOLOGIES

by **Electrozeta**
San Giorgio della Richinvelda (PN) - www.zetaecotech.it

DRY WAXING SERIES: << HECO-A-POMPA >>

For an even **more performing** use of our Waxing Machines and to make the rooted vines waxing process easier and safer, Zetaecotech has introduced **HECO-A-POMPA**, a special pump that allows a **constant wax agitation and mixing** in the main melting tank and an **automatic and safe transfer of the melted wax from the melting tank to the working tank**.

The Dry Waxing Machines of the **HECO** Series have completely changed the traditional wax melting methods by introducing an **innovative direct dry heating system**, without using diathermic oil, water, or any other liquids.

The essential key of this new system is the use of special electric heaters that are an integral part of the structural walls of the tanks, thus allowing a **direct, uniform heating**.

The introduction of this solution has overcome all the problems associated with traditional heating methods, such as harmful emissions, high energy consumption, long working times, unsafe procedures and high operating and maintenance costs.

The Dry Waxing Machines by **Zetaecotech** are designed and built with high quality raw materials, such as **stainless steel and aluminium** that guarantee great performances. Thanks to its high conductivity, aluminium allows a **uniform heating** of the tanks and **high thermal efficiency**, whereas stainless steel ensures reliability and **durability over time**.

AVAILABLE VERSIONS:

GP18-50_h350

GP18-50_h440

GPV18-50_h350

DRY WAXING SERIES: << HECO-A-POMPA >>

Latest Update: 07/08/2023

TECHNICAL FEATURES:	VERSION: GP18-50_CAST IRON	VERSION: GPV18-50_PBT
PRICE FOR YOUR ATTENTION:		
MAXIMUM CAPACITY OF THE PUMP:	50 Litres/Minute	
INTAKE DEPTH:	350 mm or 440 mm depending on the version	
OPERATION:	Continuous and adjustable Agitation/Mixing Wax transfer with manual valve Automatic wax transfer (optional control)	
POSITIONING:	Mobile pump, so that it can be positioned on each side of the waxing machine	
TOTAL ELECTRICAL POWER:	160 W	
POWER SUPPLY:	Single-Phase 230V 2P+T or Three-Phase 3P+ N+T 400 V, 50/60 Hz	
ELECTRICAL CONNECTION:	Cable with 6-pin polarised male connector	
TOTAL DIMENSIONS AND WEIGHT:	Version h350: L 540 x W 210 x H 580 mm Version h440: L 540 x W 210 x H 670 mm Total Pump Weight with stainless steel casing: 15,0 Kg.	
BUILDING MATERIALS PUMP BODY: ROTOR: VOLUTE:	Cast Iron G20	PBT
BUILDING MATERIALS MOTOR CASING:	Cast Iron G20	Aluminium
BUILDING MATERIALS PUMP PROTECTIVE CASING:	Stainless steel	
BUILDING MATERIALS PIPES:	Stainless steel or copper	
STANDARD EQUIPMENT:	Stainless steel support and adjustment plate that allows the pump to be placed in different positions in the tanks. Electric connection cable L. 3 metres Lifting and transport handle	
OPTIONAL:	Wax level control for automatic transfer	
TECHNICAL LEGISLATIONS:	Built in compliance with European Machinery Directive - EC certified
